→ For DPO's

→ For IT Team

Discovery

Globally trusted, AI-powered data discovery, monitoring, and governance on-prem or in the cloud.

Automation & Remediation

Workflows that detect, fix, clean, and secure your data across every system cloud and on-prem.

Masking & Anonymization

Protect sensitive information wherever it lives; cloud, on-prem, structured, or unstructured.

Classification

Classify, audit, and manage data with AI-driven compliance across all systems.

Governance

Enterprise-wide visibility into permissions with high-risk access detection and safe, consent-based remediation.

Search & Chat

Cut search time, surface critical enterprise insights, and collaborate to act fast.

Data Discovery

*Compliance, Simplified
Across the Globe*

AI-powered sensitive data discovery for regulatory compliance, fraud detection, duplicate cleanup, and more across file servers, Microsoft Teams, S3, MinIO, file shares, databases, and all your enterprise data sources.

Ready for Regulations

01.

Data discovery across 30+ countries and 15+ regulations, ensuring governance, reducing risk, and meeting compliance globally.

Prompt-Based Discovery

02.

Find and explore data in natural language, on-prem or via cloud LLMs, for faster, accessible insights when rules aren't enough.

Search & Chat & SAR

03.

Quickly locate initial data with semantic queries, reduce time to reach insights, and enable self-service access to accurate, governed information.

Classification Suite

On-Prem

Cloud

Unstructured

Structured

E-mails

Office

Desktop

OWA

Automatic, AI-Powered unified Data Classification

Fully automatic, AI-based classification across cloud, on-prem, structured, unstructured data. Add-ons for Office, Desktop and OWA.

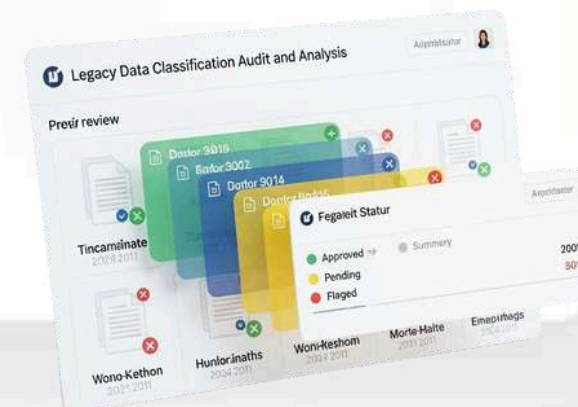

AI-Driven Classification Engine

Advanced AI models automatically identify, classify, and label data with minimal user intervention, reducing human error and operational overhead.

Legacy Classification Audit

Analyse and audit previously classified data to identify inconsistencies, gaps, and legacy risks across the organization.

Workflow-Based Classification Across On-Prem & Cloud

Flexible, workflow-driven classification that operates seamlessly across hybrid environments and diverse data sources.

- Fileservers, Databases, E-Mail servers, S3, Sharepoint, Google Workspace and more.

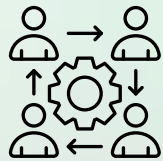

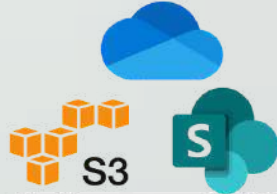

Automation & Remediation

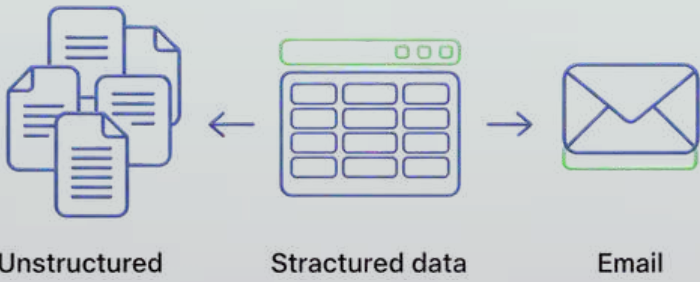

Cloud & On-Prem

Seamless remediation from cloud to endpoint.

Workflows

Automated workflows across all platforms with scheduling, monitoring, and comprehensive actions.

Supported Actions

From delete to mask, do it all.

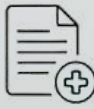

Delete

Quarantine

Classify

Encrypt

Mask

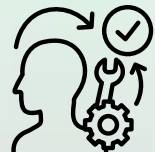

Anonymize

Consent-Based Remediation

User consent driven, fully automated remediation.

Search&Go

Search smarter, act faster.

- Remediate duplicates, expired documents, non-compliant documents or any other semantic search result.

Governance

Next-Gen Data Governance: Know, Control, Remediate, and Reduce Risks

Gain visibility into permissions, identify high-risk access, and safely remediate with consent-based workflows all across your enterprise sources. Turn static policies into dynamic protection: instantly spot risks, apply remediation, and safeguard critical information.

Consent-Based Remediation

Safely address unnecessary or risky access with approval-based workflows, ensuring compliance and control.

Risk Awareness

Combines permission data with classification information to identify high-risk or unnecessary access for faster, informed action.

Access Governance

Collects and maps permissions across all sources (LDAP, OneDrive, SharePoint, SSH, PCs, folders) for complete visibility.

Content Oriented Governance

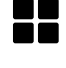

Govern your sensitive data with LLM enabled Discovery Results combined with data usage, age or location information.

Masking /

On-Prem

Cloud

Unstructured

Structured

E-mails

Dynamic Role Based Masking

- Unstructured data visibility changes dynamically based on user roles and groups, masking sensitive content when needed.

Workflow Based Permanent Masking

- Automated, scheduled data actions across all platforms, including delete, quarantine, classify, encrypt, and mask.

Customizable Masking Profiles

- Policy-driven masking profiles (PII, Financial Data, or All Findings) ensure consistent and controlled data protection.

Anonymization

Replace sensitive data with realistic, non-sensitive values for testing, analytics, or data science teams.

Search & Chat

Search Anything & Anytime, Fully Understand Data and Control It

Visibility & Consolidation

Understanding where your data lives is the first step to protection.

GEODI gives you a 24/7 search engine integrated with discovery, classification, automation and masking.

SAR

Without unified search, DSPM cannot guarantee complete and auditable SAR fulfillment

More...

Search + Chat Together to Drill down from search results directly in chat for deeper context.

Add notes, share insights, comment on search results. Collaborate with team members in real-time.

Support

We **support** our partners and customers.

Our **support teams** are always ready to help you on our service desk:

HelpDesk - All - SUPPORT

support.decesoftware.com

Technical Support

DECE Software's Technical Support provides fast, expert assistance for all GEODI deployments, integrations, configurations, and operational issues.

GEODI Academy

GEODI Academy is a comprehensive learning platform that brings together online courses, LMS modules, and technical webinars to help you learn GEODI easily at every level.

Support Q

Support Q is an AI virtual assistant trained on GEODI technical topics, regulations, and operational processes.

We Protect Your Data with **GEODI DSPM**

We are a big team with **80+ partners** around the world.
